BIO

Saint George is the solo project of Georg-Friedrich Randel, a Germany-based artist and creative director. His music sits at the intersection of late-night R&B and Alt Pop — trap-influenced production with wide synth textures, broken song structures that follow the narrative rather than formula, and a vocal range that moves freely between raw low register and falsetto. In the lineage of artists like Tinashe: vibey, moody, pop-accessible but never predictable. Every element of Saint George is self-directed: music, visuals, videos — all from his home studio.
